### **DETAILED ACTION**

Page 2

## Status of Application

Applicants preliminary amendment dated 9/8/2006 has been received and will be entered. Claims 1-54 are acknowledged as cancelled. Claims 55-91 are pending.

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 55-71, drawn to a method for making carbon nanotubes.

Group II, claim(s) 72-79, drawn to an apparatus.

Group III, claim(s) 80-82, drawn to carbon nanotubes.

Group IV, claim(s) 83-84, drawn to a composite.

Group V, claim(s) 85, drawn to dispersion or liquid composition.

Group VI, claim(s) 86, drawn to "a functional material."

Group VII, claim(s) 87-89, drawn to a film.

Group VIII, claim(s) 90-91, drawn to "a device."

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Here, the special technical feature, carbon

Page 3

nanotubes, as well as the processes and apparatus for making them, are old and known. *See e.g.*, Dai, et al., *Single-wall nanotubes produced by metal-catalyzed disproportionation of carbon monoxide*, Chemical Physics Letters 1996; 260: 471-475 and Iijima, *Helical microtubules of graphitic carbon*, Nature 1991; 354: 56-58, provided on Applicants IDS. Furthermore, it would appear as if there are features in the product claims (liquids, polymers, ceramics, dopants, functional groups, etc.) that are not accounted for in the method or apparatus claims, *i.e.* the method/apparatus does not inherently produce the products as claimed. Likewise, the reactor claims do not define a technical contribution over the prior art. Aerosol methods for introducing catalysts to a reactor and making carbon nanotubes are old and known. *See e.g.* 7,052,668 to Smalley, et al.

Given the complexity of the restriction requirement and the fact that Applicants are foreign, a telephone election was not attempted. *See* MPEP 812.01 ("[N]o telephone communication need be made where the requirement for restriction is complex, the application is being prosecuted by the applicant pro se, or the examiner knows from past experience that an election will not be made by telephone.").

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1793

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. <u>All</u> claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double

Art Unit: 1793

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL C. MCCRACKEN whose telephone number is (571)272-6537. The examiner can normally be reached on Monday through Friday, 9 AM - 6 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on (571) 272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
